### **DETAILED ACTION**

## Specification

1. The disclosure is objected to because of the following informalities: Page 3 line 2 indicates that "the invention has the following advantages." Only one advantage is numbered, and the "." Should be replaced with a colon.

Appropriate correction is required.

2. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use. A "parts" list should be incorporated into the specification to allow the reader to have a better understanding of the combinational functionality of the parts in conjunction with each other.

# Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or

REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)

- (e) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.

Page 3

Application/Control Number: 09/845,588

Art Unit: 2882

- (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (i) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

## Claim Objections

- 3. Claim 1 is objected to because of the following informalities: Line 10 appears to be a typographical error "...said moving project". It is presumed that the applicant intended that it should be "said moving object" Appropriate correction is required.
- Claim 1 is objected to because of the following informalities: Lines 9-11 are awkwardly described and need to be re-worded for improved clarity. Appropriate correction is required.
- 2. Claim 4 is objected to because of the following informalities: Line 1 appears to be a typographical error "... aid source". It is presumed that the applicant intended that it should be "said source". Appropriate correction is required.

# Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Toth et al (US 5,982,846). Toth et al discloses a method and apparatus for acquiring an elongated radiographic image that comprises positioning an elongated object between a source of x-rays and a digital image capture device (figure 1) having a known imaging dimension which is less than a like dimension of the elongated object, moving the device in a direction parallel to the known imaging dimension to sequential contiguous positions to acquire a sequence of radiographic images of the elongated object, and rotating the source of x-rays about an axis perpendicular to the direction of moving the device in coordination with the moving object, the x-rays from the source toward the device. (figure 1)

Regarding claim 2: Toth has an adjustable collimator (52) such that between the source and object, such that the projected x-rays cover the device for imaging. (figure 10)

Regarding Claim 3: The source of x-rays is rotated about an axis coincident with the x-ray focal spot of the source. (Figure 6)

Application/Control Number: 09/845,588

Art Unit: 2882

Regarding Claim 4: The source of x-rays is rotated about an axis the distance of which from the x-ray focal spot of the source is far less than the distance from the source of x-rays to the image capture device. (figure 6,1)

Regarding claim 5: The elongated object positioned is an elongated human body part. (figure 1)

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pamela R. Hobden whose telephone number is (703)-306-5435. The examiner can normally be reached on Monday-Friday 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Kim can be reached on (703)-305-3492. The fax phone numbers for the organization where this application or proceeding is assigned are (703)-308-7382 for regular communications and (703)-308-7722 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)-308-0956.
